DATA SOURCES USED TO COMPLETE SCORING 30

Background

What is The RAFT?

- “Full-service tool” and collaborative, community-driven process designed to assist coastal localities in increasing their resilience.
- Conceived and developed by an academic interdisciplinary collaborative called the “Core Team”
 - Institute for Engagement & Negotiation (IEN) at the University of Virginia
 - Virginia Coastal Policy Center (VCPC) at William & Mary Law School
 - Old Dominion University (ODU)/Virginia Sea Grant Climate Adaptation and Resilience Program.

The RAFT has three key components:

1. The RAFT **Scorecard**, completed by the Core Team, provides a comprehensive assessment of the locality’s resilience.
2. A **Resilience Action Workshop** where participants review the assessment findings, identify achievable action items and create a one-year Resilience Action Checklist.
3. **Implementation** in which the Core Team works with a Locality Implementation Team to achieve items identified on the Resilience Action Checklist.

How does The RAFT help a locality?

1. Open a community conversation about community resilience, including gaps, and needs.
2. Support the community in identifying priority actions for the largest impact in increasing resilience.
3. Improve communication and coordination within the community and with regional and state agencies.
4. Help the community become better positioned to find and apply for relevant funding opportunities.
5. Earn a better Community Rating System (CRS) score, which saves residents money on their flood insurance premiums.

What is resilience?

The RAFT focuses on coastal community resilience, improving the ability of a community to bounce back from hazardous events such as hurricanes and extreme weather and deal with chronic issues such as flooding.

The RAFT takes a comprehensive approach by including environmental, economic, and social resilience. All three are vital for a community to thrive.

To build resilience, localities need capacities in areas of emergency management, infrastructure, planning, policy, and community well-being.

The Resilience Cycle

Adapted from: NOAA Coastal Community Resilience Indicators and Rating Systems, 2015.

Locality Total Score

Category	Score Received	Possible Score
1) POLICY, LEADERSHIP, AND COLLABORATION <i>Measures policy and legislation in place for coastal resilience and includes coordination and collaboration between various levels of government, and how accessible and open government data is to the public.</i>	9	20
2) RISK ASSESSMENT AND EMERGENCY MANAGEMENT <i>Examines how well a locality has conducted risk assessments to prepare for coastal storm hazards, identified vulnerable populations and their needs during or after a coastal storm hazard, and developed plans for disaster preparedness, including a Hazard Mitigation Plan.</i>	14	20
3) INFRASTRUCTURE RESILIENCE <i>Assesses how well the locality has identified methods and plans for storm water and protecting critical infrastructure including using natural and nature-based features (NNBF).</i>	9	20
4) PLANNING FOR RESILIENCE <i>Assesses the comprehensive plan and zoning code for resilience, how a locality is using incentives to promote resilience in building and development, how policies protect ecosystems, how they use green infrastructure to improve resilience, and how much resilience has been incorporated into planning.</i>	12	20
5) COMMUNITY ENGAGEMENT, HEALTH, AND WELL BEING <i>Assesses how the community engages with residents in planning for coastal storm hazard including social equity considerations and examines the locality's attention to issues of health and wellness during and after coastal events.</i>	10	20
Total Score:	54%	

Interpreting the Score

Low Resilience: Less than 50%- There are plenty of opportunities for improvement. The locality should decide whether it will be more beneficial to achieve the least difficult improvements first, or to tackle more challenging problems. The key is to decide which of these approaches makes the most sense, as the locality develops their Resilience Action Checklist.

Moderate Resilience: 50%- 74% – The locality is actively involved in coastal resilience planning and has achieved some successes. There are still opportunities for strengthening resilience. The Resilience Action Checklist should focus on weak categories and anticipate moderate to difficult improvements.

High Resilience: 75% or More- Locality is well prepared! There may still be room for resilience and the Resilience Action Checklist may focus on ways to improve resilience and further engage residents. Examples of locality policies, plans, and activities may assist other localities in the region and beyond.

If you see **CRS** next to an item, action to improve that metric can result in CRS credit.

If you see **\$\$\$** next to an item, action to improve that metric supports economic resilience.

If you see  next to an item, action to improve that metric supports environmental resilience.

If you see  next to an item, action to improve that metric supports engagement with vulnerable populations.

1) LOCALITY LEADERSHIP, POLICY, AND COLLABORATION

1.1 LOCALITY LEADERSHIP AND PLANNING FOR RESILIENCE:

2 / 4 Points

Collaboration among local government decision makers, officials, departments, academia, and NGOs is important in planning for coastal resilience. Effective collaboration requires identifying local leaders and organizations, establishing the roles of such leaders and organizations, and providing leadership training and educational resources.

Points	Scoring Metric	Notes
1	a. Leadership roles are identified for staff and/or elected officials important for planning for resilience. If staff is limited or nonexistent, the locality has tasked someone with handling resilience efforts for the community.	Per locality staff, the Town Manager or Deputy Town Manager/Public Works Director would handle resilience-related issues specific to the Town. The Planning Director would be a possible alternate.
0	b. Training and education events are held for elected officials specifically on resilience issues.	Per locality staff, this is not done at the local level and would typically come from an external agency such as the NNPDC.
1	c. Training and education events are held for locality staff, or if staff is limited or nonexistent, training of whomever has been tasked with handling resilience efforts for the community.	Per locality staff, this is not done at the local level, but does happen through participation with NNPDC.
0	d. Locality staff and/or elected officials, or whomever has been tasked with handling resilience efforts for the community, are meeting at least once per quarter to coordinate planning specifically on resilience issues.	No information available or provided.

1.2 LOCALITY LEADERSHIP AND RESPONDING TO EMERGENCY:

4 / 4 Points

Collaboration among local officials and relevant stakeholders is equally important in responding to a coastal hazard. An organized, coordinated response to a coastal hazard requires identifying stakeholders, establishing roles, creating plans, and publicizing information.

Points		Scoring Metric	Notes
1		a. Locality has identified stakeholders who will require emergency response including socially vulnerable populations.	Northern Neck Regional Hazard Mitigation Plan starting at 3-7.
1		b. Locality has established internal emergency response roles (e.g., standing committees, staff titles), and these staff and partners participate in at least one training each year.	Yes, the Colonial Beach Police Department, Colonial Beach Fire Department (self-supported organization with volunteers), and an all volunteer Colonial Beach Rescue Squad. Colonial Beach Comprehensive Plan , pp. 2-48 to 2-49. Additionally, for large scale events, Westmoreland County would be involved.
1		c. Locality collaborates on resilience planning with the stakeholders who will need emergency response and has provided the public with opportunity to give input from lower income vulnerable populations.	Northern Neck Regional Hazard Mitigation Plan starting at 2-7
1		d. Locality has a means of communicating these plans to the public during a coastal storm hazard event.	Northern Neck Regional Emergency Operations Plan , Westmoreland County, Section B. Communications, Section C. Emergency Public Information. Per locality staff, there is an EOC SOP which identifies how the Town will interact with the County during a crises (noting that most large-scale events involved county representative and county assets). Additionally, per locality staff, the public is notified through the Town's website, public notice, and (in some instances) the E911 system.

1.3 LOCAL COLLABORATION WITH STATE AGENCIES AND REGIONAL PDCs:

1 / 4 Points

Coastal resilience issues go beyond political boundaries; therefore, localities benefit from regional collaboration. Regular communication between local, multi-jurisdictional, and state officials encourages sharing of information and ideas. Collaboration should include working with agencies that serve socially vulnerable communities. Localities are part of a Planning District Commission (PDC), which coordinates many activities.

Points		Scoring Metric	Notes
1		a. Locality staff and/or officials engage with regional and state agencies on resilience-oriented issues.	See generally Northern Neck Regional Hazard Mitigation Plan ; Town's participation in the NNPDC.
0		b. Locality participation in local and regional resilience-oriented committees and initiatives to serve socially vulnerable populations.	No information available or provided.
0		c. Locality elected officials participate on relevant local and regional resilience-oriented commissions.	No information available or provided.
0	\$\$\$	d. Locality staff work to identify funding opportunities and priorities to address resilience issues at the regional and state level.	Per locality staff, the Town actively pursues grants for resilience projects (and connects citizens to these opportunities). However, this is not necessarily done by the Town on a regional or state level scale.

1.4 ADAPTIVE MANAGEMENT:

2 / 4 Points

Adaptive management involves updating ordinances and plans for coastal resilience based on new findings and emerging strategies. Use of data, scientific analyses, and new information is important to inform local policies to prepare. Adaptive management means incorporating lessons learned from research that informs best methods for addressing the needs of socially vulnerable populations.

Points		Scoring Metric	Notes
1		a. Locality incorporated new data, scientific analyses, and approaches to resilience, within the last five years into the Floodplain Management Ordinance.	Updated in 2015.
1		b. Locality incorporated new data, scientific analyses, and approaches to resilience, within the last five years into Zoning Ordinance.	Per list of different articles within the Zoning Ordinance , other than the FPM article, eight other articles were updated in 2015.
0		c. Locality incorporated new data, scientific analyses, and approaches to resilience, within the last five years into Site and Subdivision Ordinances.	Updated in 2011.
0		d. Locality incorporated new data, scientific analyses, and approaches to resilience, within the last five years into Comprehensive Plan.	Updated in 2009. Note that per locality staff, the Town is currently undergoing a review and update process. Design Guidelines revised in 2013.

1.5 The NFIP's COMMUNITY RATING SYSTEM:**0 / 4 Points**

Communities wishing to go above and beyond the minimums of the National Flood Insurance Program can choose to participate in the Community Rating System (CRS). Participating communities implement higher standards of floodplain management, and, in return, residents are eligible for flood insurance premium reductions. Localities can do many things to improve their scores. For more information, see FEMA's CRS website or the Wetlands Watch website on the subject.

Points		Scoring Metric	Notes
0	CRS	a. Locality has achieved a CRS Score of 9 or higher.	Locality does not participate in CRS.
0	CRS	b. Locality has achieved a CRS Score of 8.	Locality does not participate in CRS.
0	CRS	c. Locality has achieved a CRS Score of 7.	Locality does not participate in CRS.
0	CRS	d. Locality has achieved a CRS Score of 6 or lower.	Locality does not participate in CRS.

TOTAL SCORE FOR SECTION 1:**9 / 20 POINTS**

2) RISK ASSESSMENT AND EMERGENCY MANAGEMENT

2.1 FLOOD EXPOSURE AND VULNERABILITY ASSESSMENT:

4 / 4 Points

Localities should conduct and use an assessment of their flood exposure and vulnerability in developing policies and programs. Localities should be knowledgeable of their flooding risks, raise awareness in the community about vulnerable areas, help target action to assist the most threatened areas and reduce possible damage, and save costs by being preemptive not reactive.

Points		Scoring Metric	Notes
1	CRS	a. An exposure and/or vulnerability assessment is completed, mapped and updated within the last 5-7 years, available at the locality level, and (as evidence of being used) referenced in locality policy making.	Northern Neck Regional Hazard Mitigation Plan at 4-12.
1	CRS	b. Sources of flooding for both tidally-driven and precipitation-driven events are identified and updated within last 5 years.	They have separate sections for riverine and coastal flooding. Northern Neck Regional Hazard Mitigation Plan at 4-10, 4-25
1	CRS	c. Flooding for different return period storm events is identified and mapped.	Northern Neck Regional Hazard Mitigation Plan at 4-22, 4-23
1	\$\$\$ CRS	d. Additional vulnerabilities (see above), including cultural, historic and economic assets, are identified and updated within the last 5 years.	Northern Neck Regional Hazard Mitigation Plan throughout Section 3. Community Profile, and 4-74

2.2 RISK ASSESSMENT FOR VULNERABLE POPULATIONS:

3 / 4 Points

Localities should conduct risk assessments of their socially vulnerable populations. These populations include those in areas of high poverty, elderly, caregivers, veterans, homeless, transient or nomadic communities, children and youth, physically or mentally disabled people, medically fragile people and non-English speakers. Because these populations may not have resources to change their level of vulnerability, it is vital for localities to identify these populations, ways to reduce their risk, and create plans for assistance during and after coastal hazard events. Localities need to conduct outreach to vulnerable populations.

Points		Scoring Metric	Notes
1		a. Locality has identified vulnerable populations that are subject to flooding and coastal storm hazards.	Per locality staff, the Town has informally identified vulnerable population bases.
1		b. Locality has engaged vulnerable populations and provided them with meaningful information (e.g., in their own language, relevant to their circumstances) relating to their vulnerability to coastal storm hazards.	Per call with locality, there is interaction with Westmoreland County to support situational awareness in a crisis as well as involvement of the American Red Cross.
1		c. Locality has worked with vulnerable populations to increase their emergency preparedness and evacuation plans so they know their risk and know what steps should be taken during and after an event.	Colonial Beach Police Department maintains a “We Care” program designed to look out for elderly citizens living alone. Although not specifically designed for emergency preparedness/evacuation plans, the program can achieve this goal. Colonial Beach Comprehensive Plan , p. 2-48.
0		d. Locality partners with organizations that provide assistance to vulnerable populations before, during and after coastal storm hazards, including food banks or pantries with refrigeration units and backup generators.	In addition to items noted above in in this section, see the Northern Neck Regional Emergency Operations Plan , Basic Plan, starting at 2; Each County’s Functional Annex, Section E. Medical and Health, Section G. Rescue/Emergency Medical Services, Section H. Warning, Evacuation and Emergency Transportation, Section I. Shelter Operations

2.3 BUSINESS AND ECONOMIC RISK ASSESSMENT:

2 / 4 Points

Localities need to identify local business and economic vulnerabilities to coastal storm hazards. Businesses are differentially affected by these hazards and attention should be paid to making sure that businesses that serve vulnerable populations are considered. Including business and economic vulnerability in a risk assessment and emergency management is important for resilience and recovery after a storm event.

Points		Scoring Metric	Notes
1	\$\$\$	a. Locality has included the business sector in its assessment and mapping of coastal hazard vulnerability	Northern Neck Regional Hazard Mitigation Plan , Sections 3.10, 3.11, 3.12, 3.13
0	\$\$\$	b. Locality has engaged economic development department and/or independent chamber of commerce in locality hazards mitigation and/or resilience planning.	Colonial Beach Business District Revitalization Plan does not address hazard mitigation or resilience – focus is on economic revitalization generally.
0	\$\$\$ 	c. Locality and/or business associations have programs for small businesses, particularly businesses that serve socially vulnerable populations, to encourage each business to be prepared for an emergency and plan for business continuity.	Colonial Beach Business District Revitalization Plan does not address hazard mitigation or resilience – focus is on economic revitalization generally.
1	\$\$\$	d. Locality emergency management communicates with business sector in the event of severe weather emergency or evacuation.	This would be done in the same manner as the general public. Northern Neck Regional Emergency Operations Plan , Westmoreland County, Section B. Communications, Section C. Emergency Public Information. Additionally, per locality staff, the public is notified through the Town’s website, public notice, and (in some instances) the E911 system.

2.4 HAZARD MITIGATION:

4 / 4 Points

The Hazard Mitigation Plan (HMP) is required by state code as a condition of emergency assistance. In the coastal region, it is important for the HMP to specifically address coastal storm hazards by identifying what locality resources and areas are at risk, to enable the locality to take actions to reduce future risks. Furthermore, having an HMP is essential to be eligible for certain grants and funding related to coastal storm hazards.

Points		Scoring Metric	Notes
1		a. The locality’s HMP specifically addresses coastal resilience.	See generally, Northern Neck Regional Hazard Mitigation Plan .
1		b. The locality is engaging in regional coordination for Hazard Mitigation through a regional plan.	See generally, Northern Neck Regional Hazard Mitigation Plan .
1		c. The locality’s HMP details how the locality collaborates with VDEM, DCR Floodplain Management or SHMO.	Northern Neck Regional Hazard Mitigation Plan , starting at 2-3
1		d. The locality’s HMP is approved by FEMA, was developed with meaningful public engagement with socially vulnerable communities and is formally adopted by locality governing body.	FEMA Hazard Mitigation Plan Status

2.5 RESIDENT EMERGENCY PREPAREDNESS:**1 / 4 Points**

Well-organized emergency preparedness plans save lives and property and help ensure that localities can act in sufficient time. They contribute to faster and more efficient post-hazard recovery. Preparedness for vulnerable populations includes ensuring that residents have the opportunity to learn swimming and water safety skills. Communities should consider participating in regional, national, or state-wide outreach events such as Hurricane Preparedness Week.

Points		Scoring Metric	Notes
0	CRS	a. Locality has a current resident emergency preparedness plan, updated within the last five years, which identifies resident emergency preparedness risks and needs, including knowledge of water safety.	Last updated 2010. Northern Neck Regional Emergency Operations Plan . Per locality staff, there is a Town Emergency Preparedness Document that is scheduled for update/revision in 2020. However, The RAFT Team is unsure of the current date of that document.
0	CRS	b. Locality conducts community outreach at least once a year to inform residents about community emergency preparedness.	Per locality staff, this is not done at the Town level. Per response from Westmoreland County staff, there is nothing formal at this time.
0	CRS	c. Locality engages resident groups, including schools, hospitals, and other groups, in testing preparedness through emergency drills, disaster simulations, and planning workshops.	Per locality staff, this is not done at the Town level. Per response from Westmoreland County staff, there is nothing formal at this time.
1	CRS 	d. Locality has implemented early warning signals/systems/emergency warning tools for its residents, particularly those most vulnerable.	Northern Neck Regional Emergency Operations Plan , Westmoreland County, Section B. Communications, Section C. Emergency Public Information. Additionally, per locality staff, the public is notified through the Town's website, public notice, and (in some instances) the E911 system.

TOTAL SCORE FOR SECTION 2:**14 / 20 POINTS**

3) INFRASTRUCTURE RESILIENCE

3.1 STORMWATER INFRASTRUCTURE:

0 / 4 Points

Stormwater management is regulated by state law, which requires localities either create and operate a stormwater management program or request the state to operate its stormwater management program. Local ordinances must comply with the Virginia Stormwater Management Act and regulations, as well as the Virginia Erosion and Sediment Control Law. Additional stormwater management and flood risks are typically handled at the local level through environmental regulation, site plan approval, and subdivision approval. Localities that go beyond the minimum state requirements are better able to manage stormwater and increase their resilience to coastal storm hazards. Stormwater infrastructure may include use of bioswales, dry ponds, retention basins, rainwater management systems, low impact development, rainwater collection and management systems, green infrastructure, rooftop gardens, and green and open spaces.

Points		Scoring Metric	Notes
0	\$\$\$ 	a. Locality offers at least one official incentive for private property activities that manage stormwater.	Per locality staff, living shorelines are encouraged and citizens are being educated and exposed to this concept via a highlight visible grant process.
0		b. Locality funds stormwater management projects through stormwater utility fees, user fees, grants, or other creative funding mechanisms.	No information available or provided.
0		c. Locality implements one or more stormwater BMPs on public property for educational demonstration, as shown by signage, tours, or other information.	No information available or provided. However, recent grant funding to install one at the Town Park has been awarded. Additionally, the Town could consider working with private property owners to install signage at highly visible sites where some projects have been installed.
0		d. Locality stormwater policy goes above and beyond the minimum state requirements.	No information available or provided.

3.2 CRITICAL TRANSPORTATION INFRASTRUCTURE:

2 / 4 Points

An evaluation of critical transportation infrastructure allows a locality to understand its capacity and preparedness for coastal storm hazards. Although most localities do not manage their own roads, as this is handled at the state level, they nevertheless do have the ability to identify their transportation needs and priorities.

Points	Scoring Metric	Notes
1	a. Locality has identified critical transportation infrastructure and assessed its vulnerability within last 5 years.	Northern Neck Regional Hazard Mitigation Plan , at 3-14. Last updated in 2018. Additional studies/plans – NNC Corridor Improvement Study, NNC Coordinated Huma Service Mobility Plan, Rural Transportation Plan, and Transportation Corridor Protection Plan (not necessarily geared toward coastal hazard vulnerability and some may be in need of updating). Additionally, the Colonial Beach Comprehensive Plan includes a discussion on transportation (with main focus being safety and efficiency).
0	b. Locality has developed a plan to protect critical transportation infrastructure within last 5 years.	No official plan at this time. Per locality staff, the Town is undergoing a process to transfer existing institutional knowledge into a more formalized SOP format.
1	c. Locality has a plan available and has informed residents which critical transportation infrastructure to utilize in the case of coastal storm hazards.	Northern Neck Regional Emergency Operations Plan , Westmoreland County, Section B. Communications, Section C. Emergency Public Information. Additionally, per locality staff, the public is notified through the Town’s website, public notice, and (in some instances) the E911 system. If an evacuation, would utilize VDEM to inform residents.
0	d. Locality has a contingency plan for critical transportation infrastructure. This plan has been created and/or updated in the past 5 years.	No official plan at this time. Per locality staff, the Town is undergoing a process to transfer existing institutional knowledge into a more formalized SOP format. And the Northern Neck Regional Emergency Operations Plan was last updated in 2010.

3.3 WATER SUPPLY AND WASTEWATER MANAGEMENT SERVICES:

2 / 4 Points

Communication and coordination between a locality and its municipal water utility and wastewater utility enable a coordinated, cohesive, and synchronized response to a coastal storm hazard.

Points	Scoring Metric	Notes
1	a. Locality conducts an assessment of its drinking water supply and wastewater management, both public sources and private well owners, to identify vulnerabilities to coastal storm hazards.	Northern Neck Regional Emergency Operations Plan , p. 3-16 and NNPDC Regional Water Supply Plan Update . Additionally, the Colonial Beach Comprehensive Plan includes a water supply and wastewater discussion, starting at p. 2-41.
0	b. Locality water supply plan addresses coastal flooding and hazard events to assure safe drinking water supply and water conservation.	NNPDC Regional Water Supply Plan Update does not specifically address coastal flooding and hazard events. Per locality staff, most water and sewer operations are not located in areas that traditionally flood – but there are infrastructure effects because some areas that are served by water and sewer experience flooding.
0	c. Locality conducts a resident education program on safe drinking water to assure post-event public health and safety.	NNPDC Regional Water Supply Plan Update does not specifically discuss resident education programs.
1	d. Locality communications with municipal water and wastewater utility, to manage ongoing challenges to safe water, including during and after a storm, Alternatively or additionally, the locality has established methods of communication with private well and water system owners, to ensure all are informed about how they can increase their water system resiliency.	Per locality staff, multiple dissemination tools would be utilized. For example, Northern Neck Regional Emergency Operations Plan , website, social media, and E911. Additionally, the Wastewater Water Treatment Facility includes warning systems, critical failure processes, and other related mitigation activities.

3.4 CRITICAL INFRASTRUCTURE FOR EMERGENCY SERVICES:

2 / 4 Points

An evaluation of critical infrastructure for emergency services including shelters, emergency facilities, medical, electrical, and other essential services that allows a locality to understand its capacity and preparedness for coastal storm hazards. Critical infrastructure ensures that socially vulnerable populations, not just those who can afford it, will have access to quality drinking water, electricity, food, and shelter.

Points	Scoring Metric	Notes
1	a. Locality identifies critical infrastructure for emergency services and assessed its vulnerability within last 5 years.	<p>Northern Neck Regional Hazard Mitigation Plan at 3-15.</p> <p>Northern Neck Regional Emergency Operations Plan, Westmoreland County, Section E. Medical and Health, Section F. Fire Service, Section G. Rescue/Emergency Medical Services, Section H. Warning, Evacuation and Emergency Transportation, Section I. Shelter Operations; All Counties, Section CC. Resource Support</p>
0	b. Locality has a plan to protect critical infrastructure from storms within last 5 years.	Last updated 2010. Northern Neck Regional Emergency Operations Plan .
1	c. Locality informs residents which critical infrastructure they should use during coastal storm hazards.	Northern Neck Regional Emergency Operations Plan , website, social media, and E911. Additionally, the Wastewater Water Treatment Facility includes warning systems, critical failure processes, and other related mitigation activities.
0	d. Locality has a contingency plan for continuing services. This plan has been developed or updated in last 5 years.	Last updated 2010. Northern Neck Regional Emergency Operations Plan .

3.5 NATURAL AND NATURE-BASED FEATURES:

3 / 4 Points

Natural and nature-based features (NNBF) are features that define natural coastal landscapes and are either naturally occurring or have been engineered to mimic natural conditions. Examples include beaches and dunes; vegetated forest buffers, salt marshes, freshwater wetlands, and submerged aquatic vegetation; oyster reefs; and barrier islands. Green infrastructure (GI) is similar and complementary, and uses vegetation, soils, and other elements and practices to restore some of the natural processes required to manage water and create healthier urban environments. At the city or county scale, green infrastructure is a patchwork of natural areas that provides habitat, flood protection, cleaner air, and cleaner water. At the neighborhood or site scale, stormwater management systems that mimic nature soak up and store water. Both NNBF and GI may be undertaken by a community in a variety of ways.

Points		Scoring Metric	Notes
1		a. Locality has identified natural and nature-based features that are protective and can assist with coastal resilience.	Colonial Beach Comprehensive Plan provides, in various places, an inventory of natural features including surface water features, drainage characteristics, floodplains, wetlands, woodlands/vegetative cover, marine life/wildlife, steep slopes, sensitive soils, and other environmental systems. Also, Future Land Use Plan Designations include a “Conservation District”.
1		b. Locality has developed plans and policies that use natural and nature-based features to enhance coastal resilience.	Per locality staff, the Town utilizes a “living shorelines” methodology in appropriate projects (i.e., Monroe Bay side of Town) to educate and expose citizens via a highly visible grant process.
1		c. Locality is implementing projects that are in accordance with the plans and policies developed to utilize natural and nature-based features to increase coastal resilience.	Per locality staff, the Town recently received an award to conduct living shoreline activities on a municipal property and there is a desire to continue these types of projects as funds (grant funds) become available. The Town is also continuing to apply for funding to support open space conservation easements.
0	\$\$\$ 	d. Locality offers incentives for the use of natural and nature-based features to increase coastal resilience.	No information available or provided.

TOTAL SCORE FOR SECTION 3:

9 / 20 POINTS

4) PLANNING FOR RESILIENCE

4.1 BUDGET, FUNDING AND STATE & FEDERAL ASSISTANCE:

3 / 4 Points

Coastal hazard mitigation efforts, when properly funded, can reduce or prevent damage and decrease costs from storm damage. To ensure proper funding a locality can budget for mitigation efforts, assess the potential economic impact from a coastal storm hazard, and identify sources of funding for mitigation projects.

Points		Scoring Metric	Notes
1		a. Locality has incorporated into its Capital Improvement Plan (CIP) funding for coastal resilience. Projects could include upgrading critical infrastructure, water and wastewater systems, and/or food and health systems, with priority for needs of vulnerable populations.	Colonial Beach CIP (2019-2020) identifies projects for Robin Grove Shoreline and a Storm water management Plan.
0	\$\$\$	b. Locality has conducted an economic impacts assessment of coastal storm hazards.	No information available or provided.
1		c. Locality has identified specific actions for coastal resilience (pre/post-flooding mitigation) in Hazard Mitigation Plan.	Northern Neck Regional Hazard Mitigation Plan , Appendix D. 2017-22 Mitigation Actions Update. Additionally, see reference below (and earlier in Scorecard) regarding living shorelines.
1		d. Locality has identified funding for non-CIP coastal resilience projects, including priority needs of vulnerable populations impacted by coastal storm hazards.	Per locality staff, the Town recently received an award to conduct living shoreline activities on a municipal property and there is a desire to continue these types of projects as funds (grant funds) become available. The Town is also continuing to apply for funding to support open space conservation easements.

4.2 COASTAL RESILIENCY IN COMPREHENSIVE PLAN:

3 / 4 Points

A comprehensive plan is a locality’s vision for future land use, development, adaptation, and resilience. Coastal resilience can be addressed in comprehensive plans by incorporating elements such as green infrastructure, open space preservation, infill development, the National Flood Insurance Program (NFIP), the Community Rating System (CRS), and stormwater management. The ideal comprehensive plan identifies equity and the need to identify and support socially vulnerable populations as a priority for resilience, as well as a priority preference for restoration, green infrastructure and connectivity.

Points		Scoring Metric	Notes
1		a. The comprehensive plan discusses how community engagement around coastal resilience informed the plan.	Colonial Beach Comprehensive Plan , starting at p. 3-1 includes a summary of citizen involvement, such as community surveys and workshops.
1		b. The comprehensive plan includes clear discussion of coastal resilience and coastal storm hazards and incorporates assessments to inform the development of policies to reduce vulnerability to coastal storm hazards.	Community surveys completed as part of the Colonial Beach Comprehensive Plan process included questions about natural resources – respondents expressed the need to protect water quality, water supply, and the shorelines from erosion.
1		c. The comprehensive plan includes goals and objectives for preserving and protecting natural resources that mitigate coastal storm hazards.	The Colonial Beach Comprehensive Plan includes multiple objectives and strategies, such as further identification of natural features to protect them from development, conducting studies and evaluations of environmental features to be used as the basis for future assessments, working with environmental agencies and universities to develop educational materials, and providing residents and business with information about important environmental issues.
0		d. The comprehensive plan addresses impacts on critical infrastructure and essential services from coastal storm hazards, particularly for impacts affecting socially vulnerable populations.	Not at this time. Per locality staff, the Town is currently undergoing a Comp Plan review/update which might address this scoring metric.

4.3 LAND USE ORDINANCES:

2 / 4 Points

A locality's land use ordinances (such as zoning, subdivision, and floodplain) should enact the locality's vision and policies laid out in its comprehensive plan. Land use ordinances can be used to conserve and protect natural resources, ecosystems, agricultural lands, and areas vulnerable to flooding. Localities are required to enact Chesapeake Bay Preservation Act ordinances and going beyond these ordinances provides greater resilience.

Points		Scoring Metric	Notes
1	CRS 	a. Locality land use regulations protect areas vulnerable to flooding by limiting development inside the floodplain or encouraging development outside the floodplain.	Floodplain Overlay District , Zoning Ordinance.
1	CRS 	b. Locality land use regulations protect areas vulnerable to flooding by setting higher standards in existing flood zones or by designating additional flood zones beyond those designated by FEMA.	No evidence of additional flood zones beyond those designated by FEMA. But Floodplain Overlay District includes Coastal A Zone, freeboard requirements, etc.
0	CRS 	c. Locality land use regulations protect areas vulnerable to flooding by setting buffers, including open space.	No information available or provided to indicate that buffers have been established for purposes of flood protection.
0	CRS 	d. Locality land use regulations protect areas vulnerable to flooding by using setbacks to protect flood-prone areas.	Zoning Ordinance , specifies setback requirements for all zoning designations. No clear language about setbacks used specifically to protect flood-prone areas.

4.4 INCENTIVES FOR COASTAL RESILIENCE:

1 / 4 Points

Incentive programs encourage infill development and protect open spaces, while protecting flood-prone areas and critical ecosystems. Incentives should be developed with community input, with particular attention to consulting agencies and organizations working with or providing services to lower income and vulnerable populations as well as agencies and organizations working to build community resilience.

Points		Scoring Metric	Notes
1	\$\$\$	a. Locality offers an incentive for achieving coastal resilience goals: discourage development in areas prone to flooding; protect critical ecosystems; encourage sustainable development; improve resilience in high-risk areas; and preserve natural assets.	Per locality staff, living shorelines are encouraged and citizens are being educated and exposed to this concept via a highlight visible grant process. And, local ordinances define and encourage LID to the maximum extent practicable.
0	\$\$\$	b. Locality offers a second incentive for achieving the goals listed above.	No information available or provided.
0	\$\$\$	c. Locality offers a three or more incentives for achieving the goals listed above.	No information available or provided.
0	\$\$\$ 	d. Locality develops incentives in consultation with agencies and organizations working with socially vulnerable populations.	No information available or provided.

4.5 NATURAL RESOURCE PRESERVATION:

3 / 4 Points

Natural resources are important to the locality's economy, environment, and quality of life. Natural resources also can help protect against coastal storm hazards and minimize damage from coastal storm events. The preservation of these critical natural resources is paramount to providing resilience for a coastal locality during these events. These actions should go beyond the required Chesapeake Bay Preservation Act Ordinance.

Points		Scoring Metric	Notes
1	CRS 	a. Locality has identified and mapped natural resources that are important for broad ecosystem health and which are at risk of being lost due to flooding and coastal storm hazards.	Colonial Beach Comprehensive Plan provides, in various places, an inventory of natural features including surface water features, drainage characteristics, floodplains, wetlands, woodlands/vegetative cover, marine life/wildlife, steep slopes, sensitive soils, and other environmental systems.
1	CRS 	b. Locality has developed plans and policies that preserve and restore natural resources to increase coastal resilience.	The Colonial Beach Comprehensive Plan includes multiple objectives and strategies, such as further identification of natural features to protect them from development, conducting studies and evaluations of environmental features to be used as the basis for future assessments, working with environmental agencies and universities to develop educational materials, and providing residents and business with information about important environmental issues.
1		c. Locality has programs with residents, civic organizations, and nonprofit organizations to educate community about the natural resource preservation plan and engage them in helping to implement the plan.	Per locality staff, living shorelines are encouraged and citizens are being educated and exposed to this concept via a highly visible grant process.
0		d. Locality is funding actions that implement the natural resource preservation plan.	Per locality staff, although the Town was unsuccessful in a recent attempt to secure grant funding for open space conservation easements, the Town will continue to seek out and apply for this type of funding.

TOTAL SCORE FOR SECTION 4:

12 / 20 POINTS

5) COMMUNITY ENGAGEMENT, HEALTH, AND WELL-BEING

5.1 PUBLIC INVOLVEMENT IN RESILIENCE PLANNING:

2 / 4 Points

For community resilience, it is important to use meaningful engagement strategies where residents are able to provide feedback and suggestions through meetings, workshops, and surveys. To reach people of color and the elderly, media and social media that serves these populations is effective. Public engagement enables residents and other stakeholders to provide input to the locality. Better informed residents are better able to ensure their locality remains resilient to coastal storm hazards.

Points		Scoring Metric	Notes
0		a. Locality has a written policy regarding the role of residents and businesses, schools and educators, institutional, nonprofit, faith-based communities veterans, and other stakeholders in coastal resilience.	Per locality staff, there are some written facets regarding the roles of some institutions/organizations, but it is not as holistic as it could be – might be addressed in the EOC SOP that is scheduled for an update in 2020.
0	CRS	b. Locality has staff dedicated to public engagement on coastal resilience, including a standing committee that addresses coastal resilience as part of its work.	Not specifically.
1	CRS 	c. Locality holds at least one public meeting per year, including one in vulnerable resident areas to address coastal resilience issues and posts the results of the public meetings. For 75-150,000, at least two such public meetings per year; for 150,000+ at least three per year.	Per locality staff, there are no specific meetings on this – rather if there was an issue to discuss, it would be done as part of an existing meeting or on a regional level.
1	CRS 	d. Locality informs and engages vulnerable population about coastal resilience by using website, social media, media serving people of color and minorities, and faith-based organizations to enable them to provide suggestions about issues and strategies.	Per locality staff, coastal related information is provided through a variety of methods (social media, website, E911, and public meetings). Additionally, hard copies can be provided at meetings.

5.2 PROVIDING COASTAL RESILIENCE INFORMATION TO THE PUBLIC:**3 / 4 Points**

The public needs free and open access to information related to coastal resilience and planning. Information sharing allows residents to understand their risks and the importance of resilience. Information should be shared easily and presented in a manner which is clear and easy to understand, and easy to access in ways that reach different populations in the community.

Points		Scoring Metric	Notes
1	CRS	a. Locality provides to the public localized user-friendly information on coastal resilience, in digital and non-digital formats and in multiple languages where appropriate based on demographics.	Per locality staff, coastal related information is provided through a variety of methods.
1	CRS	b. Locality provides to the public localized user-friendly information on coastal resilience, on a website (e.g., interactive maps).	Per locality staff, information is provide via social media and website.
1	CRS	c. Locality provides localized user-friendly information on coastal resilience in public spaces (e.g., public offices or library).	Per locality staff, information is provided at public meetings.
0	\$\$\$	d. Locality provides the public with localized, user-friendly information about economic costs and risks associated with coastal storm hazards.	No information available or provided.

5.3 CITIZEN LEADERSHIP & VOLUNTEER NETWORKS FOR COASTAL RESILIENCE:**1 / 4 Points**

Developing resident leaders and strong volunteer networks are important aspects of building a locality's health and wellness resilience. Leaders can be responsible for informing residents, expressing resident concerns, and assisting with local preparedness. Leaders can be called on during emergencies to assist residents in need and to assist with post-hazard recovery. Communities can build this capacity by offering volunteer opportunities to cultivate experienced, local responders.

Points		Scoring Metric	Notes
1		a. Locality supports and invests in community-led initiatives on coastal resilience.	Per locality staff, the Town pursues grants and offers limited assets/supplies to shelter type activities.
0		b. Locality offers training opportunities and education opportunities for resident leaders or volunteers to educate residents on what they can do to increase their resilience on individual properties or in neighborhoods.	Per locality staff, training is not offered. However, there may be opportunities for the Town to provide educational venues (although barriers to implementation/action may be more funding related than knowledge related).
0		c. Locality supports resident leaders or volunteers in community education and outreach efforts about coastal resilience by providing them with materials, speakers for gatherings, or support for resident action projects.	Nothing specific.
0		d. Locality highlights the work of resident leaders or volunteers in supporting and advancing coastal resilience, on its website, through social media, Facebook, awards, or other means.	No information available or provided.

5.4 RESILIENT SYSTEMS TO PROVIDE FOOD, HEALTH, AND MEDICINE:

4 / 4 Points

If a community’s food, health, and medicine systems are not resilient before a storm, then the community may face a substantially longer recovery. Food, health, and medicine systems must be sustained before, during and after storm events, and are dependent on critical systems, including transportation and utilities. Lower-income and minority populations often already struggle to access food, health, and medicine, and are among the vulnerable populations during a coastal storm hazard.

Points		Scoring Metric	Notes
1		a. Locality has emergency plans for provision of food, health, and medicines to residents, through its comprehensive, hazard mitigation, or other plans.	Northern Neck Regional Emergency Operations Plan , Westmoreland County, Section E. Medical and Health, Section F. Fire Service, Section G. Rescue/Emergency Medical Services, Section H. Warning, Evacuation and Emergency Transportation, Section I. Shelter Operations; All Counties, Section CC. Resource Support
1		b. Locality has plans for providing food to vulnerable populations, has areas for improvement, has developed partnerships to address these needs, and has provided information to residents on how to access food during emergencies and coastal storm events.	See above (sections on shelter operations and resource support).
1		c. Locality has plans for providing healthcare to vulnerable populations, has areas for improvement, has developed partnerships to address these needs, and has provided information to residents on how to access healthcare during emergencies and coastal storm hazards.	See above (sections on medical and health, fire service, and rescue/emergency medical services).
1		d. Locality has plans for providing medicine to vulnerable populations, areas for improvement, has developed partnerships to address these needs, and has provided information to the public on how to access medicine during emergencies and coastal storm hazards.	See above (sections on medical and health, fire service, and rescue/emergency medical services).

5.5 PHYSICAL AND MENTAL HEALTH FOR SOCIAL EQUITY IN COMMUNITY RESILIENCE: 0 / 4 Points

To ensure that socially vulnerable and underserved populations do not experience disproportionate impacts from flooding and coastal hazards, a locality needs to be able to predict how its residents may fare during a coastal storm hazard event, and then help those who are most vulnerable. One key measure that can be useful to localities in this effort is the metric for “deaths of despair”— or the prevalence of suicide, cirrhosis of the liver, and overdoses – which can serve as a proxy for the locality’s physical and mental health, as persons who are suffering from depression and addictions are less likely to be able to respond effectively during flooding events. A locality with good physical and mental health will be better able to respond effectively to new or changing conditions as well as to recover from stressful events.

Points		Scoring Metric	Notes
0		a. Locality maintains data on community physical and mental wellbeing and challenges through specific metrics, such as the metrics for “deaths of despair” (suicide, cirrhosis of the liver, overdoses).	Per locality staff, the Town does not do this. But, it may be done on a state or regional level?
0		b. Locality has met at least once with community partners to identify “trusted messengers” for communicating with vulnerable populations.	No information available or provided.
0		c. Locality has identified, or maps its vulnerable neighborhoods, and has done this in partnership with NGOs, faith- based organizations, and its health and community services board.	No information available or provided.
0		d. Locality has a plan with these NGOs, faith-based organizations, and health and community services board that helps its physically and mentally challenged vulnerable populations prepare for coastal flooding events, and that provides assistance to them during and after these events.	No information available or provided.

TOTAL SCORE FOR SECTION 5: 10 / 20 POINTS

Opportunities

Example of an Opportunity Action Item Checklist showing possible actions to improve scores in each scorecard category. Opportunity items for your locality will be determined by your implementation team and The RAFT core team.

Locality Action Category	Score	Opportunity Actions for Score Improvement	Potential Time Commitment Short-Term: < 1 year; Mid-Term: 1-3 years; Long-Term: > 3 years
1.4 Adaptive Management	≤ 2	Incorporate new (<5 years) data, analysis, and approaches to resilience into:	
		Floodplain Management Ordinance.	MT – LT
		Zoning Ordinance.	MT - LT
		Site and Subdivision Ordinances.	MT – LT
		Comprehensive Plan.	MT – LT
2.3 Business and Economic Risk Assessment	≤ 2	Include the business sector in assessment and mapping of coastal hazard vulnerability.	MT
		Engage economic development department and/or chamber of commerce in hazard mitigation and resilience planning.	MT
		Develop programs for small businesses that serve socially vulnerable populations to encourage emergency preparedness and post-hazard business continuity.	MT – LT
		Encourage communication between emergency management and business sector during severe weather emergencies or evacuations.	ST – MT
4.4 Incentives for Coastal Resilience	≤ 2	Offer an incentive (or multiple incentives) for achieving coastal resilience goals.	MT
		Discourage development in areas prone to flooding.	MT - LT
		Protect critical ecosystems and preserve natural assets.	MT – LT
		Improve resilience in high-risk areas.	MT - LT

Next Steps

Resilience Action Workshop

- Community leaders work together to create a one-year **Resilience Action Checklist**.
- The RAFT Core team helps to **identify achievable action items** for improving resilience.
- Localities break into focused discussion groups to **identify 3 to 5 top opportunities** for the next year to increase resilience.
- Large group discussion on **regional sharing**, followed by breakout into locality discussion groups to:
 - **Identify a Locality Implementation Team;**
 - **Create a timeline for actions;**
 - **Coordinate logistics;**
 - **Determine next steps for implementation team.**

Implementation

- **Identify a Locality Implementation Team** made up of local officials and residents that will work with the Core Team to accomplish checklist actions and projects.
- **Work with one of the Core Team members** who will set up periodic check-in meetings or calls to track progress and provide support.
- Assistance from RAFT partners could take the form of:
 - **Communications product development;**
 - **Hazard and critical infrastructure mapping;**
 - **Policy and legal analysis;**
 - **Model ordinance and comprehensive plan language;**
 - **Green infrastructure projects;**
 - **Workshop or meeting facilitation;**
 - **Community engagement recommendations;**
 - **Specific research or data collection projects.**
